Qwik Lock<sup>®</sup> Filter Fastening System –  
Makes installing or removing your filter  
quick, easy and secure.

**20' / 6M**

Large carrying handle provides easy transport.

Easy-reach accessory storage bag keeps accessories close at hand.

Convenient cord wrap.

Easy access power switch for quick operation.

Cart handle with accessory storage improves vac mobility.

2½" x 7' Dual-Flex<sup>®</sup> Locking Hose offers 180° flexibility at both hose ends for better maneuverability.

Blowing port for added versatility.

Large latches make emptying the drum or changing the filter a snap.

2-piece drum provides rugged construction and increases stability.

Large drain located at the drum's lowest point for quick and easy liquid disposal.

Large rear wheels provide mobility up steps, over thresholds, and rough terrain.

WORKSHOPbrand

Real-world performance data achieved from testing at the end of the hose. Competitors typically test at or near motor. Gallons indicated reflect drum volume, not necessarily collection capacity. Actual capacity dependent upon type of debris collected, condition of filter, and other factors. Peak Horsepower represents a level at or below the maximum horsepower output of an electric motor tested in a laboratory using a dynamometer. All details subject to change without notice.
